

The MonoPulse 21 Active Range.

In 2021, MonoPulse Loudspeakers will have been selling worldwide for **21 years**.

Their core **MonoPulse** principle is impulse precision, giving outstanding realism and positioning of voice and sound-stage. This is presented in a custom built loudspeaker, with all the acoustic quality, power and bass, of top level hi-fi – with bass down to 20Hz and power handling up to 500 watts

The 21 Range adds all current streaming protocols, plus input and control facilities. These, with amplification, are completely contained in an elegant speaker pair. This is combined with the existing wide MonoPulse option range, to make unique offer.

The input choices give full high-specification streaming – with top-end hi-fi at its heart. They will accept the full range of inputs, with IR and computer/phone remotes.

Wi-Fi – Wireless, Ethernet or Optic from the router. 24-bit resolution. There is full wi-fi control, plus added in-room infra-red track selection, volume, bass & treble.

Bluetooth – 16-bit resolution. This gives a simpler access from other sources – such as the phone of a guest. Also has separate infra-red control as above.

Input with controls – via 3.5mm, for c.d., Alexa or equivalents - with IR control.

Direct input – to amps via RCA sockets, for Phono. Manual volume control only.

USB/memory stick – via input USB, with infra-red controls.

Use as conventional speakers – 300 watts, 25Hz or 500 watts, 20Hz per channel.

Product choices. All the established **MonoPulse** hi-fi specifications with choices of -

Model S based – 100 watts – or 200 watts bi-amp, bi-wire - 25hz bass.

Model A based – 200 watts – or 400 watts bi-amp, bi-wire - 20hz bass

All major streaming sources and streamed radio are compatible.

Expansion to multi-room – via Wi-Fi. Allows LP or CD in other rooms.

All this – in an elegant, easily movable, 20cm wide, 1 metre high, speakers (Model S) – custom made in a wide choice of colours and finishes – you just need a 13A socket.
